JOHN FRASER,
LEA BRIDGE ROAD NURSERIES,
ESSEX, N.E.

GENERAL
DESCRIPTIVE CATALOGUE.

THE NURSERIES

Are about Five Miles from London, and are easily reached by Train
on the Great Eastern Railway to Lea Bridge Station.

BIBLIOTHÈQUE
CONSERVATOIRE BOTANIQUE
VILLE DE GENÈVE
2
PRINTED BY TRUSCOTT, SON, & SIMMONS, SUFFOLK LANE, CITY, E.C.

JOHN FRASER,

IN issuing his Annual Catalogue, takes the opportunity of thanking his patrons for past favours, and begs to solicit a renewal of their confidence. He also desires to intimate that everything is offered at the lowest possible rate, and as the whole of the stock is in the best condition, he feels assured that purchasers will be well pleased with anything they may order.

From the increasing desire to have a succession of Flowers during the winter and early spring months, and with a view to save trouble in selecting from the various sections of the Catalogue, a list of plants suitably prepared to effect that purpose will be found at page 53, which, it is hoped, will be useful. This list contains all the most desirable plants, either for adorning the conservatory, or for general decorative purposes.

Owing to the uncertainty of getting a crop of choice Fruit in the open air, a large quantity of Fruit Trees in pots, for growing in Orchard Houses, has been prepared; these are remarkably fine, and promise a good crop in the ensuing year.

Purchasers of Stove and Greenhouse Plants for Exhibition have now a good opportunity of selecting from the fine stock on hand; the large plants of Azalea Indica are particularly fine, they are in robust health, and full of flower buds.

Roses, both in the open ground and in pots, are all vigorous plants, of the best quality, and as the stock on hand is extensive, orders for large quantities can be well supplied.

A large stock of Greenhouse and Stove Plants is always on hand. These are grown in moderate-sized pots, and are either in bloom, or full of bloom buds, so that they produce some effect at once.

All goods are delivered free in London, and (to country customers) for orders amounting to 40s. and upwards, plants will be presented to compensate for the charge made for carriage.

It may be as well to notice that good Trees, Shrubs, or Plants can be supplied at the prices stated in the Catalogue, but large specimens are charged for in proportion to their size.

Any new plants sent out by other houses, and not named in the Catalogue, can be supplied at the advertised prices.

The price of any plant to which a price is not affixed may be had on application.

It is respectfully requested that Post Office Orders may be made payable at "Leyton, N.E.," and all packages or returns be addressed, "JOHN FRASER, to be left at Four Swans Inn, Bishopsgate Street, London, till called for."

Planting or Laying out Ground to any extent done by Contract, or otherwise.

EXPERIENCED GARDENERS RECOMMENDED.

1865-1866.

JOHN FRASER,

LEA BRIDGE ROAD NURSERIES,

ESSEX, N.E.

GENERAL
DESCRIPTIVE CATALOGUE.

The Nurseries are about Five Miles from London, and are easily
reached by Train on the Great Eastern Railway to
Lea Bridge Station.

NEW AND CHOICE PLANTS.

The following New and Choice Plants, extracted from the general collection, are strongly recommended, and ought to be included even in the most limited and select collections.

STOVE PLANTS.

- Achimenes Rollisonii*, a striking new variety, with large purplish lavender flowers; the throat yellow, while the centre is thickly spotted with purplish crimson spots on a light ground; of a robust habit and very free flowering, 10s. 6d.
- Adiantum colpodes*, fronds similar to those of *A. capillus Veneris*, but the sori are quite different, the margin appearing to be crenated. In the young state the fronds are prettily tinted with rose, 5s.
- Allamanda Hendersonii*, an excellent free-growing stove climber. Flowers orange yellow, very thick and wax-like, tinged with brown on the reverse side, continuous in blooming. Foliage dark glossy green, of excellent habit, 21s.
- Alocasia Zebrina*, one of the handsomest of the genus, with sagittate foliage and beautiful zebra-marked leaf stalks, 42s.
- Anthurium cordifolium*, large heart-shaped leaves (in mature specimens 2 feet long) of a velvety olive green, ribbed with white, and with yellowish tinted veins, the young leaves are coppery pink, and change to a beautiful green as the plant acquires age. Excellent for exhibition purposes, 42s.
- *Scherzerianum*, a beautiful novelty. Its rich scarlet blossoms, which remain from two to three months in bloom, have a novel and fine effect. Of easy culture, and very free blooming, 42s.
- Bougainvillea lateritia*, a showy stove climber. Its great beauty consists in the floral leaves or bracts which accompany the flowers; these are salmony pink, while in all the others of the genus they are mauve. When trained in a pot, it makes an excellent exhibition plant, 21s.
- Caladium Veitchii*, leaves large, and of a rich light bronzy green, with a fine metallic purple lustre on the under side, 21s.
- Draccena Cooperii*, very ornamental in its habit; young leaves of a rich glossy red, gracefully recurved. A fine plant for decorative purposes, 10s. 6d.
- *stricta*, the most beautifully variegated of all this fine tribe, far surpassing any other variety, 7s. 6d.
- Dipladenia amabilis*, a new hybrid of great beauty; the flowers are of a deep rosy crimson, nearly as large as *D. splendens*, and produced abundantly, 10s. 6d.
- Franciscea calycina*, a most beautiful species of this well-known genus, 7s. 6d.
- *Lindeniana*, very large mauve-coloured flowers. A plant of fine habit, free growth, and with very handsome foliage. One of the best, 31s. 6d.
- Gardenia florida variegata*, a variegated form of *G. florida*, which it resembles in habit, 15s.
- Gymnogramma Pearcei*, a fine species of this favourite genus; the fronds are very delicate and graceful, and very elegant. It is an acquisition to any collection of ferns, 21s.
- Manettia micans*, a vigorous growing stove climber, with flowers of bright reddish orange the foliage is rich dark glossy green, 10s. 6d.
- Rogiera gratissima*, the flowers are of a delicate pink colour, and very fragrant, produced in corymbs, and, as the plant is nearly always in flower, are excellent for bouquets, 31s. 6d.
- Sphærogyne latifolia*, in the way of *Cyanophyllum magnificum*, with splendid rich velvety olive green foliage, 7s. 6d.

GREENHOUSE PLANTS.

- Azalea (Indica) Stella*, flowers large, and of a bright orange scarlet, with a violet stain on the upper segments of the corolla, where it is profusely spotted with lake. It is a vigorous growing variety, 21s.
- *Vesuvius*, flowers brilliant orange scarlet, slightly tinted with purple on the upper petals, fine form and substance, unequalled in the brilliancy of its colour; foliage small, and the plant very compact in habit, 21s.
- *Guillaume III.*, deep rich orange, very large and finely formed, good habit, and an abundant bloomer, 7s. 6d.

- Azalea* (Indica) Maximilian I., rose, spotted and striped with carmine, edged with white, very free bloomer, a fine double sort, 7s. 6d.
- *Reine des Beautés*, salmon rose, with dark rose spots, largely bordered with white, very distinct and striking, 7s. 6d.
- *Roi des Beautés*, lively rose, suffused with violet and edged with white excellent habit, double, and very free flowering, 10s. 6d.
- *Souvenir de Van Duys*, white, largely flaked with rosy scarlet, very remarkable on account of the size of its flowers, 3s. 6d.
- Eurya latifolia variegata*, the foliage is beautifully variegated, and the plant well adapted for conservatory decoration, 5s.
- Fuschia*, Beauty (Banks), sepals broad, bright scarlet carmine, corolla pure lavender, cup-shaped, of a model outline, growth free and vigorous, adapted for pyramids, 10s. 6d.
- *Enoch Arden*, sepals light scarlet, finely recurved with very rich indigo, blue cup-shaped corolla, a bold and effective variety, 2s. 6d.
- *Father Ignatius*, sepals broad and bold, brilliant carmine scarlet, well reflexed, rich blue corolla, an effective and graceful flower, 2s. 6d.
- *War Eagle*, sepals broad and recurved, of a brilliant rich carmine colour, fine dark purple cup-shaped corolla, streaked with rose, 2s. 6d.
- Lilium Auratum*, delicate ivory white, thickly studded with crimson spots, and a bright gold band through the centre of each petal, deliciously scented; the flowers are from eight to ten inches across. This magnificent lily is particularly recommended. Every one who has a greenhouse ought to have several roots of it, especially as they vary in the colour and time of flowering, 3s. 6d., 5s. to 7s. 6d.
- Primula prænitens* (Double Chinese Primrose) candidissima, pure white, changing to light blush, robust habit and free flowering, 5s.
- *delicata*, white, shaded with flesh, good habit and free blooming, 5s.
- *Fairy*, blush, changing to deep light rosy pink, 5s.
- Rhododendron*, Countess of Haddington, a fine hybrid between *R. ciliatum* and *R. Dalhousianum*, of compact and vigorous growth, flowers rosy blush, upwards of 3½ inches in diameter, a good bloomer, 21s.
- *Princess Alexandra*, a hybrid from *R. jasminiflorum*, colour pure waxy white, with pink stamens, chaste and elegant in appearance, and very free flowering, 21s.
- *Princess Alice*, very fragrant, with large white blossoms, 5s.
- *Princess Helena*, another hybrid from *R. jasminiflorum*, colour of both tube and lobes of a delicate soft pink, striped with darker shades of the same, and delicately tinted; the foliage is rich, dark, glossy green; it is a profuse bloomer, and of very compact habit, 21s.
- *Veitchii*, very large white flower, with a crisped edge, 7s. 6d.
- Rhynchospermum jasminoides variegatum*, a beautiful variety of the well-known *R. jasminoides*, 5s.
- Tacsonia Van-Volxemii*, a fine greenhouse climber, with bright crimson flowers hanging from thread-like peduncles, 6 to 8 inches in length, 5s.

HARDY PLANTS.

- Aubretia Campbells*, resembles *A. purpurea* in habit; its leaves are arranged in close erect terminal leaf tufts, from the axils of which are produced a profusion of rich violet purple blossoms. It remains in flower from March till July, 2s. 6d.
- *Purpurea Variegata*, an excellent variegated form of the well known *A. purpurea*, leaves broadly margined with white, a fine plant for rockwork and spring gardening, 2s. 6d.
- Aucuba limbata*, the best of all the variegated leaved varieties introduced from Japan, 21s
- *Japonica vera*, a hardy ornamental evergreen shrub from Japan, one of the finest recently introduced, 5s.
- Berberis stenophylla*, a fine new hardy shrub, free in growth and producing an abundance of rich apricot coloured blossoms, succeeded by a plenteous crop of purple berries, 5s.
- Clematis Fortunii*, very large double white flowers, which are produced in great abundance; one of the best of the many recently introduced varieties, 5s.
- *Jackmanii*, a splendid hardy climber, with velvety violet purple flowers, measuring 6 to 7 inches across, 7s. 6d.
- *Standishii*, another very handsome hardy variety, producing large deep violet flowers, 3s. 6d.
- Cupressus Lawsoniana pygmaea*, a beautiful dwarf compact growing evergreen, in the style of the golden arbovitae, 3s. 6d.
- Hepatica angulosa*, a beautiful new variety from Hungary, flowers 1½ inch across, of a fine greyish blue colour, set off by an array of black anthers, which surround a tuft of yellow styles; one of the finest hardy plants of recent introduction, 5s.
- Retinospora leptoclada*, a beautiful cypress-like plant, very hardy and ornamental, 7s. 6d.

- Rhododendron Chianoides*, pure white, with cluster of pale yellow spots, 7s. 6d.
 — Hon. Mrs. Carlton, a magnificent white, 3s. 6d.
 — Ingramii, pale blush, with blotch of lemon spots, 5s.
 — Madame Miolan Carvalho, fine white, with greenish brown spots, fine shape and substance, 7s. 6d.
 — Marguerite, blush, tinged with puce, with cluster of yellow spots, good truss, 5s.
 Rose, Mdle. Amelie Halphen, beautiful lively rosy carmine, flowers large, double, and well shaped, habit vigorous, 3s.
 — Charles Margottin, fine glossy carmine, deepening to brilliant fiery red in the centre, flowers very large, the outside petals well rounded, very fragrant, foliage fine, and the habit robust and vigorous, 3s.
 — Madame Charles Verdier, beautiful distinct rose colour, flowers very large, double, well shaped, and lasting, habit vigorous, a magnificent variety, 3s.
 — Madame Roussel, beautiful delicate rose, with a silvery tint, flowers large and cup shaped, habit very vigorous, 3s.
 — Marechal Neil, beautiful deep yellow flowers, very large, double, and globular, and excessively fragrant; foliage large, undulating, and shining, said to be the finest rose of the Tea or Noisette Section, 3s.
 — Xavier Olibo, velvety black, shaded with lively amaranth, and brilliantly tinted, flowers large, double, and well shaped, habit vigorous, 3s.
Sciadopitys verticillata, the celebrated umbrella tree of Japan, one of the finest and most distinct of the conifers, 7s. 6d.
Skimmia fragrans, a new free growing shrub, good evergreen foliage, with very fragrant flowers, 7s. 6d.
 — *oblata*, a free growing shrub from Japan, with dense clear green leaves and bright red oblate berries, quite different from the dull red oblong fruit of the other *Skimmias*. The leaves and habit are also distinct from the other varieties, 10s. 6d.
Thujaopsis dolobrata, one of the finest coniferous trees introduced, of fine habit and perfectly hardy, 7s. 6d.

PELARGONIUMS.

- Conqueror, pale lilac, maroon spot on upper petals, 2s. 6d.
 Diana, lower petals deep pink, slightly blotched, top petals maroon, with crimson margin, 2s.
 Eurydice, white, in the way of Ariel, 2s. 6d.
 Exhibitor, light rose, white centre, top petals reddish maroon, 3s. 6d.
 Flourish, rosy scarlet, light centre, black rayed dark blotch on the top petals, 5s.
 John Hoyle, orange red, light centre, richly marked with dark red, top petals rich velvety maroon, extra, 5s.
 Mary Hoyle, warm orange rose, white centre, small dark blotch, surrounded by bright orange, 5s.
 Pretty Mary, orange rose, maroon top petals, fine, 3s. 6d.
 The Rival, orange salmon, pure white centre, the upper petals rich maroon, 7s. 6d.
 Sunny Memories, orange rose, rich maroon blotch, with broad margin of orange, extra, 5s.

FANCY PELARGONIUMS.

- Anne Page, crimson, blended with violet, light throat and edges, 3s. 6d.
 Blair Athol, intense crimson, 2s.
 Edgar, deep maroon, nearly black, with a light throat, 3s. 6d.
 Mrs. Dorling, mottled lilac, with white throat and edges, 3s. 6d.
 Mrs. Ford, upper petals delicate, margined with white, lower petals white, suffused with lilac, 3s. 6d.

GERANIUMS OF THE SCARLET SECTION, HAVING HORSE-SHOE OR PLAIN LEAVES.

- Achilles, intense vermilion, 2s. 6d.
 Ary Zang, clear salmon, veined with bright orange, 3s.
 Emile Licau, deep salmon colour, 5s.
 Hector, clear soft rose, 1s. 6d.
 Les Gaules, rosy salmon, marbled deeply with orange carmine, fine white centre, 3s. 6d.
 Louis Roeseler, rose, shaded with carmine and spotted with rose, 3s. 6d.
 Madame Werle, bright rosy salmon, edged white, 5s.
 Napoleon (Nosegay), blood red, with a white centre, said to be the deepest red of the section, 2s. 6d.
 Nonsuch, soft flesh colour, with rose centre, 2s. 6d.
 Venus, clear orange scarlet, white eye, 2s. 6d.

CATALOGUE OF PLANTS.

AZALEA INDICA.

It is well known that Thrips are the most destructive insects that infest the Azalea. The following mixture has been found the best remedy:—Take five or six pounds of soft soap and dissolve it in about twelve gallons of rain water, then add a gallon of strong tobacco liquor; dip the plants, and before they become dry, wash them in a tub of clean soft water, and not one thrip will be left alive. The same process should be gone through again in about a fortnight's time, so that the young (which appear to come from eggs attached to the back of the leaves) may be killed as soon as hatched. A strong fumigating with tobacco is a good check, but nothing answers so well as dipping the plants in the above mixture.

It is not necessary to adhere strictly to the quantities of soft soap, &c., stated, as a much stronger mixture does not hurt the plants. Immersing the plants entirely, so that every part is wetted, is best; but if they are too large to dip, the syringe, with a fine rose, can be used.

The prices quoted are for good strong plants; smaller plants of most of the varieties may be had at a lower rate.

Own selection of 12 fine sorts, small plants	18s.	
Ditto ditto with flower buds, fine	30s.	
Fine specimens, from 10s. 6d. to £5 5s. each.		s. d.

GLOXINIAS.

The Gloxinias are particularly recommended to the notice of those who have a stove, vinery, or forcing-house; they can also be brought forward in a common cucumber frame. It is impossible to describe the richness of colour in some of the flowers of these plants,—the foliage of some of the varieties is also very beautiful; they come into flower about May, and generally last till August, or, if the growth is somewhat retarded in the spring, they may be had in flower as late as September or October. While in bloom these plants form beautiful ornaments for the conservatory or drawing-room.

A fine assortment of Gloxinias, in strong flowering roots, at 12s. to 18s. per doz.

WITH DROOPING FLOWERS.

Alba grandiflora, pure white, large	1	0	Delicata, delicate light rose, with white throat, spotted, new in colour and quite distinct	3	0
Angelina, rich rose, flaked with white	2	0	Ecarlate et Lilas	2	6

 white eye

Vignette, crimson scarlet

Vis-a-Vis, bright violet, large white centre

Warrior, rosy pink, B

Wonderful, deep ruby crimson, with light
 centre, B

GLADIOLUS GANDAVENSIS.

This list contains all the finest varieties of this beautiful tribe. The following hints may be of service to those who may not have had any experience in their culture:—For situation, choose a warm, and well drained spot of ground, sheltered from the west wind; if the soil is poor, enrich it with thoroughly decayed leaf mould. Select a warm day when the ground is dry for planting, and place the bulbs about three inches deep. Do not plant till the end of April, or beginning of May, or even later, if the season is wet and cold. Should any of the bulbs start into growth before planting time, let them be potted in light soil, and kept in a cold frame until the time comes for planting the whole collection.

This fine tribe has somewhat fallen in the estimation of the gardening world, as the foliage frequently turns yellow and withers away just before coming into flower. To prevent this, mulch the beds, and water abundantly directly the dry weather begins. It will be better to change the bed in which they are grown every year.

NEW GLADIOLI FOR 1865-66.

	s.	d.		s.	d.
EURYDICE, pure white, flamed with bright carmine rose, large flower, and perfect in shape	10	6

Nonpareil, lilac, large

Novelty, large blush white, incurved

Oliver Cromwell, red, finely incurved

Orange Perfection, sparkling orange, finely incurved

Orpheus, blush, incurved

Othello, dark rose carmine, finely incurved

Phœbus, bright golden orange, fine late flowering greenhouse variety, splendid colour

Phæton, large dark golden orange

Pictorium Roseum, red salmon, fine

PINK PEARL, delicate pink, with silver shade, finely incurved, good for specimens or cut blooms, 2s

Plutus, bright gold

Pomona, dark orange fawn, incurved

Poudre d'Or, golden red

Prince Albert, bright crimson, fine

— Alfred, rose and crimson, large and full, finely incurved

— Consort, crimson violet, incurved

— **OF ANEMONES**, lilac blush anemone, fine, A. 2s.

— **OF WALES**, dark purple violet, with lighter shade, finely incurved, good show flower, 2s.

Princess Alexandra, delicate lilac blush, with lemon centre, extra

— Louis of Hesse, bright rose pink, dwarf and free

— **MARGUERITE**, lilac pink, with lighter centre, anemone flowered, A. 2s.

— Marie, rose

— Mary, blush white, incurved

— of Wales, pearl white, with delicate rosy tint, large, finely incurved

Progne, amaranth, or bright crimson carmine

Prometheus, fiery red salmon, incurved

Psyche, bright yellow, incurved, dwarf habit

Queen of England, splendid blush

— Lilacs, beautiful bright lilac, finely incurved

Queen Margaret, rosy lilac, fine and distinct, A.

— of the Isles, pure white, incurved

— Whites, large white, incurved

QUILLED BEAUTY, orange cinnamon, very double, 2s.

RANUNCULUS, purple maroon, incurved, 2s.

Rev. J. Dix, orange red and lighter centre, incurved

Rifleman, dark red, full and finely incurved

Robert James, cinnamon and orange, broad petals, finely incurved

Rolla, purple lilac

Rose Marguerite, bright rose, light centre, A

Sabrina, large, blush changing to cherry

Sam Slick, ruby, with golden points, dwarf habit

SAM WELLER, Indian red, golden tips, incurved, 2s.

Samuel Broom, red cinnamon with orange centre, double

Sanguinea, red crimson, distinct

Saumarez, bright red chestnut, incurved

Seraph, sulphur with yellow centre, very double, finely incurved

Sir Stafford Carey, brown chestnut, with golden points, large and incurved

— George Bowyer, dark rose purple, finely incurved

Snowball, pure white, very double

Snowflake, pure white, very dwarf

Sparkler, bright orange, tipped red, incurved, fine dwarf habit

St. Andrew, nankeen orange, very distinct

— Margaret, bright brassy orange, A

— Patrick, ruby red, finely incurved

SUNFLOWER, sulphur anemone, high gold centre, 2s.

Superb, white, very late

Sylphide, delicate lilac and blush, incurved

Talbot, rose amaranth, tipped blush, beautifully incurved

The King of Chesnuts, beautiful bright chestnut, full centre

Trilby, sulphur white

VENUS, delicate lilac peach, finely incurved, 2s.

Versailles Defiance, rose

Vesta, pure white, early and fine

Victor Hugo, dark brown crimson, with chestnut centre, incurved and fine

VIRGIN QUEEN, snow white, finely incurved, 2s.

Voltaire, rose

White Christine, cream white, a valuable exhibition plant

Yellow Perfection, golden yellow, incurved

POMPONE, OR SMALL FLOWERING VARIETIES.

Acis, pale sulphur, full, free, fine dwarf habit

Andromeda, cream, with brown spots

Augusta, blush, dwarf, double and free

Aurora Borealis, dark orange

Bijou d'Horticulture, sulphur white

Bob, dark brown

Brazen Mirror, brassy yellow

Brilliant, crimson scarlet

Canary Bird, clear yellow, very dwarf, and compact

Cedo Nulli, a very pretty white, A.

Cinderella, white, compact form, dwarf habit

Citronella, pure clear yellow, very dwarf

Donna Alba Gonzales, yellow, shaded carmine

Drine Drine, clear yellow

Duruflet, rose carmine

Elizabeth, *fine white*
 Firefly, *bright capucin scarlet, fine and striking colour, A.*
 General Canrobert, *pure yellow*
GOLDEN AURORE, *bright gold, fine for specimens, 2s.*
 ——— Cedo Nulli, *golden yellow, tipped brown, fine, A.*
 ——— Circle, *bright golden orange, dwarf, compact habit*
 Jessie, *orange amber, very dwarf, and flowering in clusters*
 Lady Dorothy Neville, *bright golden yellow, incurved petals*
 La Vapeur, *pale canary*
 La Vogue, *bright deep yellow*
 Les Carboncles, *fine yellow*
 Lizzie Holmes, *canary yellow, with rosy tint, very double, fine form*
 Madame Cœlestine Philopal, *fine yellow*
 ——— Fould, *cream, splendid form*
 ——— Pauline Deschamps, *carmine and white*
 ——— Pepin, *lively red*
 ——— Sentir, *pure white, dwarf, A.*
 Mademoiselle Louise Lacroix
 Marie Jacquin, *white, tipped with rose*

MINNIE WARREN, *rosy blush, with yellowish centre, dwarf, 2s.*
 Modèle, *fine white*
 M. Lebois, *rosy carmine, striped and tipped with gold*
 Monsieur Eugène Lecroix, *lilac carmine*
 ——— Lefebvre Valere, *yellow, tinged with lilac*
 Mr. Astie, *bright golden yellow, A.*
 Mrs. Dix, *blush, bordered with rose*
 ——— Turner, *pure white*
MRS. WYNES, *rose lilac anemone, fine A., 2s.*
 Mustapha, *dark brown crimson*
 Nelly, *sulphur white*
 Orange Boven, *dark orange, very double*
 Polycarp, *scarlet chesnut and orange centre*
 President Decaisne, *rosy carmine*
 Princess Alice, *dark rosy carmine, brilliant colour and very fine*
 Sagetta, *blush, very double and dwarf*
 Saint Thais, *orange crimson*
 The Little Gem, *delicate rose with white border*
 Viola, *violet lilac, with blush points, very double and distinct*
WHITE TREVENNA, *fine white, excellent shape, 2s.*

Japonicum
 Laciniatum

Striatum
 Yellow Dragon

PHLOX.

To have Phloxes in the finest possible condition, they must not be planted out in the borders and left to their fate; I therefore insert the following remarks on their culture:—

In February, pot a few plants in light, rich loamy soil, and place them in a greenhouse or frame, where they will soon make shoots long enough for cuttings. These can be quickly rooted in a moderate hot bed, with Verbenas or other bedding plants, and after being properly potted and hardened off, they will be fit to plant out in May.

In selecting a situation for planting out, a spot where there is a little shelter from strong winds is to be preferred, but otherwise it should be fully exposed to all the air and sunshine.

The soil should be enriched with some good rotten manure, and when the plants get strong they should be liberally watered with liquid manure. They should be planted about 15 inches apart for the first season's blooming, which will commence about August, and continue till the end of September; but in the ensuing spring they should be re-planted, placing them 18 or 20 inches apart, for the second year's blooming; this will begin in July, and if the plants are prevented from seeding they will go on flowering till the end of September. Care should be taken to have a good stake to each plant; and as the shoots advance in growth they should be securely tied to it. If this is neglected they are very likely to be snapped off close to the ground. A slight wind is sufficient to do this, and then the plant is spoiled for the season.

If a Phlox is well managed, it will be in its prime in the second year of its flowering. Early in the spring, when the shoots are three or four inches long, it is a good plan to thin them out. A good two-year old plant will generally start more shoots than are required, but five or six only should be left to go up for flowering. The spare shoots make excellent cuttings, but they can seldom be rooted early enough to flower the same year like those obtained from plants put into a greenhouse in February. However, the plants obtained from these cuttings make fine flowering plants for the next year.

There cannot be much done in arranging these Phloxes according to their height; indeed, in this respect (with two or three exceptions), there is very little difference. The first year they generally flower when about 15 or 18 inches high, but the same plants in the second year will grow two or three feet high.

A continual succession of young plants should be kept up by cuttings. Dividing the old roots is a clumsy method of increasing the stock, and plants obtained in this way

seldom produce fine healthy foliage and good flowers. A Phlox should be thrown away when it gets over two years old, and a young plant put in its place. Sometimes Phloxes may be placed here and there in mixed borders or shrubberies, where they help to make a garden gay and furnish a supply of cut flowers, but the spare plants only ought to be used for this purpose, as they never, under this treatment, produce such fine flowers as when they have a place to themselves.

Phloxes may be easily grown in pots by attending to the same instructions given for growing them in the open ground, only they require more care in watering.

The varieties of Phlox decussata are the best and hardiest, and have been very much improved lately. There used to be some pretty varieties of Phlox pyramidalis, but they are delicate, and have given place to the former.

Price 9s. and 12s. per dozen, except those priced.

Andromede, *purple rose, dark centre*
 Apollon, *bright amaranth, centre scarlet*
 Augustine Lierval, *white, with rose centre*
 Baron Davesne, *violet rose, with crimson scarlet centre*
 ——— de Meiners, *bright mauve, with large carmine centre*
 Belle Normandie, *salmon, perfect form*
 Boree, *rich reddish purple, extra*
 Boule de Nieve, *fine white*
 Brilliant, *deep rose, suffused with salmon*
 Cassiope, *rich reddish violet, extra*
 Charles Rouillard, *brilliant deep cerise, with crimson centre*
 Comte de Quelen, *rosy crimson*
 Comte Vigier, *salmon rose, extra large*
 Czarina, *white, dwarf*
 Danae, *white, centre deep rose*
 Diomedee, *crimson violet, extra fine form*
 Docteur Bois Duval, *bright reddish purple*
 Docteur Lecroix, *bright purple, crimson centre, fine form*
 Dr. Josset, *peach colour, with deep rose centre, extra fine form*
 Dumont de Courset, *bright rose, with crimson centre*
 Eblouissant, *violet rose, with large crimson centre*
 Edouard Andry, *brilliant deep cerise*
 Eurus, *rosy crimson, very large*
 Evening Star, *bright rosy lilac, with white star-like centre*
 F. Desbois, *light rose, with large crimson centre, fine*
 Ferdinand 2nd, *rosy claret, with crimson centre*
 General Radetzky, *white, striped with crimson, a greenhouse variety*
 Gustave Duchesne, *richly-shaded rosy crimson, fine*
 Harlequin, *violet shaded, fine*
 Hebe, *mauve, dark centre, very bright*
 Hector Rouillard, *rich deep cerise*
 Josephine Touret, *pure white, with deep rose centre*
 L'AMI CABASSET, *reddish salmon, 2s. 6d.*
 L'Ange d'un Proscrit, *light lilac, tall*
 LADY E. HOME, *beautiful clear white, with large purple eye, splendid, 2s. 6d.*
 La Candeur, *shaded white, with reddish purple centre*
 Latone, *white, centre rose carmine*
 Le Drapeau Blanc, *pure white, excellent form*
 Le Gamin de Paris, *deep rosy crimson*

Le Vesuve, *amaranth, with bright crimson centre*
 Louise Grell, *surpassing General Radetzky, more brilliant, 1s. 6d.*
 Macrantha, *lilac, white centre, showy*
 Madame Amazili, *soft rose, centre red, fine*
 ——— Annette de Lisle, *very fine white*
 ——— Bernard, *white, with purple centre*
 ——— BONNEAU, *violet red, purple centre, 2s. 6d.*
 ——— de Caen, *white, with large purple centre, fine*
 ——— DE SMET, *brilliant rose, centre purple, 2s. 6d.*
 ——— DELAMARE, *salmon colour, dark centre, 2s. 6d.*
 ——— de Wendel, *shaded white, with large purple centre*
 ——— Fontaine, *white, with crimson centre*
 ——— Heinemann, *pure white, with purplish carmine centre, large truss*
 ——— HENRIQUE, *deep rose, with crimson centre, 2s. 6d.*
 ——— Houlet, *light rose, crimson centre*
 ——— Kumph, *crimson, with rich dark centre*
 ——— le Cerf, *fine white, late*
 ——— LEMOINE, *white, centre marked with red, 2s. 6d.*
 ——— Lierval, *dark carmine, with bright reddish purple centre*
 ——— Pepin, *salmon, extra fine*
 ——— Petit, *rose, extra large, and fine*
 ——— PICOUL, *salmon colour, fine centre, 2s. 6d.*
 ——— Pigny, *rosy carmine, with crimson centre*
 ——— Sueur, *white, with crimson centre*
 Mademoiselle Alexina Dufour, *rose, carmine centre*
 ——— ATGER, *white, marked with rose, extra fine, 2s. 6d.*
 ——— Anais Aubert, *white, with large violet centre*
 ——— Fontaine, *light lilac rose*
 ——— Marie Bienville, *white, with rich purple centre, fine*
 ——— Orelly Duriez, *white, with violet centre*
 ——— Trotter, *white, with reddish purple centre*
 Magnificent, *dark lilac, fine, tall*
 MARIE LIERVAL, *pure white, with purple centre, 2s. 6d.*
 Master Punch, *dark rose*

MONSIEUR A. VERSCHAFFELT, *bright salmon colour, 2s. 6d.*

— **A. WEICK**, *brilliant red, fine shape, 2s. 6d.*

— **Chauviere**, *rich violet rose*

— **CROUSSE**, *salmon colour, 1s. 6d.*

— **Edmund About**, *very bright rose, with rich centre, tall*

— **EMILE GRUNENBERGER**, *scarlet, finely shaped, 2s. 6d.*

— **Gros**, *white, purple centre, large, tall*

— **LECART**, *salmony - violet, finely shaped, 2s. 6d.*

— **MARIUS PORTE**, *salmon colour, with scarlet centre, 2s. 6d.*

— **MOREAU**, *deep salmon colour with red centre, 2s. 6d.*

— **NOURY DE MAUNY**, *salmon, shaded with rose, flowers large, shape excellent, said to be the finest of all the Phloxes, 2s. 6d.*

Monsieur Rollisson, *rosy purple, crimson centre*

Ne plus ultra, *smooth rosy salmon, fine*

Parmentier, *dark rose, tinged with salmon, crimson centre, fine*

Peroine, *lilac, white centre, dark eye, good*

Prince Troubetskoy, *bright rose, with red centre*

Raphael, *rose, shaded with purplish red*

Souvenir de M. Pirole, *rich salmony crimson*

— **d'un Ami**, *bright rosy purple, large and fine*

Surpasse Madame Rendatler, *white, with purple centre, 2s. 6d.*

Spencerii, *rosy lilac, light centre, very dwarf*

Toulouque, *purple, suffused with lilac, centre crimson, superb*

Vicomtesse de Belleval, *rich salmony rose, extra*

Victor Hugo, *rosy carmine, with deep crimson centre*

William Guillot, *pure white*

PLANTS, BULBS, &c., FOR EARLY FORCING.

The plants in the following list are specially prepared to force, for flowering in winter and early spring.

Acacia armata	1	6	Lily of the Valley, strong clumps, producing many spikes of flowers,	1s. to	2	0	
— Drummondii	1	6	Narcissus of sorts, per pot.	1s. „	1	6	
Azalea amoena	2s. 6d. to	3	6	Peach, double crimson	2	6	
— indica Cœlina.	2s. 6d. „	3	6	— — carnation striped	2	6	
— — Duc de Nassau	2s. 6d. „	3	6	— — white	3	6	
— — Exquisite	2s. 6d. „	3	6	— — camellia flowered	2	6	
— — Fielderii	2s. 6d. „	3	6	— — pink	2	6	
— — LouiseMargottin	2s. 6d. „	3	6	— — rose	2	6	
— — magnifica pleno	2s. 6d. „	3	6	Pinks of sorts	0	6	
— — Minerva	2s. 6d. „	3	6	Primula sinensis in variety	1s. to	1	6
— — optima	2s. 6d. „	3	6	Rhododendron album elegans	3	6	
— — perfection	2s. 6d. „	3	6	— — Blatteum	3	6	
— — Princess Mary of Cam- bridge	2s. 6d. „	3	6	— — Caucasicum novum	5	0	
— — — Royal	2s. 6d. „	3	6	— — choice hybrids	2	6	
— — punctata rosea	2s. 6d. „	3	6	— — Everestianum	3	6	
— — Roi Leopold	2s. 6d. „	3	6	— — purpureum grandiflo- rum	2	6	
— — Thusnelde	2s. 6d. „	3	6	— — — ponticum, in variety 1s. 6d. to	2	0	
— — pontica and other hardy sorts	2	6	— — — Kermesina	3	6		
Andromeda floribunda	3s. 6d. „	5	0	— — — Titian	3s. 6d. „	5	0
— — pulverulenta	2	6	— — — Rosamond	3s. 6d. „	5	0	
Amygdalus sinensis alba pleno	2	6	— — — Victoria	3	6		
Carnation Tree, in variety	2	0	— — — and a few others	2s. 6d. „	3	6	
Cinerarias, strong seedlings	1	0	ROSES, best varieties of				
Crocus of sorts, per pot	0	6	Bourbon	1s. 6d. to	2	6	
Dielytra spectabilis	1	6	Fairy	1	0		
Double White Almond	2	6	Hybrid Perpetual	1s. 6d. to	2	6	
Deutzia crenata flore pleno.	1s. to	1	6	Hybrids of China, Provence, and Bourbon	1s. 6d. to	2	6
— — gracilis	1s. „	1	6	Moss	1	6	
— — scabra	1	6	Provence	1	6		
Geraniums, early flowering	1s. „	1	6	Tea, scented	1s. 6d. to	2	6
Guelder Rose	1	6	Spirea japonica	1	0		
Hyacinths of sorts	9d „	1	0	— — prunifolia flore pleno	1	6	
Jonquils of sorts, per pot	1	0	Sweet Briar	0	6		
Kalmia glauca	1	6	Syringas, of sorts	1	6		
— — latifolia	2s. „	3	6	Tulips, of sorts	6d. to	1	0
Ledum palustris	1s. 6d. „	2	6	Weigelia rosea	1	6	
— — thymæfolia	1	6					
Lilac, Charles the 10th.	2	6					
This is the beautiful White Lilac, so much esteemed in Paris.							
— Persian	1	6					

In addition to the above, there are many varieties of Heaths, Epacris, and other green-house plants, which bloom naturally in the winter months, and of which good plants may be had, at from 1s. 6d. to 2s. 6d. each.

ROSES.

Perhaps a few cultural remarks, by practising which the luxury of the rose may be enjoyed as an adjunct to every garden, even in localities not naturally adapted to its cultivation, may not be considered out of place.

Firstly—As to Drainage. The rose will not thrive in stagnant soil, so that if drainage does not naturally exist it must be provided for. To that end the soil must be removed to the depth of three feet or so, and an outfall having been secured, six or nine inches of broken bricks, rubbish, or any rough material must be filled in, and the earth returned, which will have the advantage of raising the beds above the surrounding level. During this operation there will be a favourable opportunity for correcting any defect in unsuitable soils.

Secondly—As to Soil. That of a rich loamy character is the most proper for developing growth and bloom, and for Briars, if somewhat adhesive in quality, it will be all the better. Light soils may be strengthened by an admixture of fat loam or mellow clay; those too heavy, may be lightened by cocoa-nut-fibre, leaf-mould, rotten turf, wood ashes, and the like.

Thirdly—When roses are to be planted among other subjects in the borders, a hole of two feet deep in width and depth, should be made and filled in with a compost of rotted turf, loam, and old manure, trodden in firmly, and in the midst of it the tree should be planted. Note here, that all standards above two feet high should be securely staked at the time of planting, and not placed deeper than the collar of the root, though those on the Manetti stock must have the "work" covered an inch or two. All newly planted roses should have a good mulching of manure or some protecting material.

Fourthly—For manuring, a layer three inches thick of half decayed hot bed, laid on the beds in November and forked in the following spring, or decomposed pig manure are excellent dressings. Diluted drainings from the dunghill, stable or cowshed, poured round the plants but not touching them, are good liquid manures applied during the growing season and after the first bloom of the perpetuals has passed by.

Fifthly—As to situation a S., S.E., or S.W. aspect is the best, the beds being situate so as to receive the morning sun, in an open and airy position, but sheltered from strong winds. Roses like free circulation but are injured by cold draughts.

Sixthly—Pruning. All roses should be cut back to two or three eyes the first season of planting. Afterwards, as a general rule, strong growers require moderate, but weak growers, very close pruning.

INSECTS.—Insects are very troublesome to the Rose-grower. In Spring, almost as soon as the plant begins to grow, the "worm i' the bud" attacks it. This is only to be destroyed by hand picking; after this the Green Fly makes its appearance, which should be kept in abeyance by syringing the plants with the following mixture: Take 4 ozs. of Quassia chips and boil them ten minutes in a gallon of soft water; then strain it, and while cooling dissolve in it 4 ozs. of soft soap, to this may be added another gallon or two of soft water, and it will then be strong enough.

EARLY ORDERS ARE RESPECTFULLY SOLICITED, AS THERE IS ONLY A LIMITED STOCK OF SOME OF THE SORTS.

November and December are the best months for transplanting Roses.

Collections of Roses will be supplied on the following terms, when the selection of sorts is left to myself.

	Per dozen.
Superior selected Standards, in fine varieties	20s. to 30s.
Fine Half Standards, in fine varieties	18s. to 24s.
Fine Dwarfs	15s. to 21s.
Fine Climbing.	12s. to 18s.
Hybrid Perpetuals, in pots	— 18s.
Bourbon, in pots	— 18s.
China, in pots	9s. to 12s.
Tea Scented, in pots	— 18s.
The best varieties for forcing, established in 6-inch pots	18s. to 24s.

The Plants this year are the finest ever offered, and the prices very much reduced.

In leaving the selection of the sorts to me, customers may rely upon having an excellent assortment, and at less cost in the aggregate than the individual prices would amount to.

Only those priced as Standards can be supplied as such.

I have marked thus (T) some varieties which have been found by several Amateurs to succeed well in the neighbourhood of the Metropolis or other large towns.

PART I.

ROSES THAT BLOOM FROM JUNE TO NOVEMBER.

HYBRID PERPETUAL ROSES.

	Stds. s. d.	Dwarf. s. d.
ABBE BERLEZE, varying from cerise red, to bright rosy carmine, flowers very large, double and well-shaped, habit robust, a superb variety . . .	3 0	2 6
Abdel Kader, deep velvety purple, tinged with red, very bright towards the centre . . .	1 6	1 0

RHODODENDRONS.

N.B.—The Rhododendrons supplied at the prices here given, are good stout plants generally with bloom buds; small plants of all the varieties, can be had at a much lower rate.

	s.	d.
"ROSAMOND," a fine dwarf compact growing, and free flowering variety, the flowers are a bright clear pink, with a few small dark dots, and are produced in firm conical-shaped trusses. This Rhododendron is a great acquisition, either for the open ground or for forcing early in the spring, for the decoration of the Conservatory.	3	6
Alarm, very bright pink, with light centre	5	0
Alaric, deep purplish crimson	5	0
Album grandiflora, fine white, tinged with lilac	3	6
— elegans, white, with green spots	3	6
Alexandrina, pure white, free bloomer, very dwarf, (small plants)	3	6
Alta-clerense splendens, bright crimson, spotted, early flowering	3	6
Amilcar, deep violet purple, strongly marked with a blotch of black spots	5	0
Angiola, dark scarlet	5	0
Æneas, fine bright crimson	3	6
Athène, white, yellow blotch, good habit	5	0
Ariadne, rich rosy crimson, distinct and beautiful	5	0
Atrosanguineum, intense blood red, fine foliage	5	0
Attila, purple, tinged crimson	3	6
Autocrat, good purple, with cluster of dark spots	5	0
Bacchus, deep rose, finely spotted	5	0
Barclayanum, fine dark crimson	3	6
Baron Osy, creamy white, thickly spotted with brownish crimson, superb truss, (small plants)	10	6
Bylsianum, large rich green foliage, trusses of flowers very large, centre pure white with bright rose edge, small green spots in upper petals	5	0
Blandyanum, deep rosy crimson	5	0
—superbum, bright cerise	3	6
Blatteum, large rosy lilac, fine habit and free flowerer	3	6
Brayanum, bright scarlet, light centre, beautiful	5	0
Broughtonii, bright rose, fine large truss	5	0
Campanulatum, fine white, spotted, a distinct species	3	6
Candidissimum, blush white, brown spots	5	0
Catawbiense splendens, crimson, light throat	3	6
— hybrids, a great variety	2	6
Caucasicum album, white, with green spots, early flowering	3	6
— coccineum, bright scarlet, early flowering	3	6
— kermesinum, deep pink, early	3	6
— novum, rose colour and white, very early	5	0
— roseum, rosy crimson, very early	3	6
Chianoides, pure white, with cluster of pale yellow spots	7	6
Chloe, crimson lake, spotted, (small plants)	3	6
Ciliatum hybridum, a very distinct early flowering sort	3	6
Climax, clear rosy crimson	5	0
Comtesse de Morella, clear rose, pale centre, very large flower, compact truss, beautiful	7	6
— Salvi, delicate rose, deeply edged with bright rose, flowers very large, splendid, (small plants)	5	0
Concessum, clear rosy pink, light centre, fine	3	6
Congestum roseum, fine bright rose, beautifully spotted	3	6

TRAINING ON WALLS - - - - -	85	RHODODENDRONS - - - - -	4 & 88
CONIFEROUS PLANTS - - - - -	83		

JOHN FRASER

BEGS to say that he is at all times pleased to see Visitors at the Nursery, and to show them anything he has worth notice, but the periods at which there is the best display are as follow :—

IN FEBRUARY AND MARCH—

Forced Flowers and Early Flowering Greenhouse and Stove Plants.

IN APRIL, MAY, AND JUNE—

The large Exhibition Plants of Azaleas, Geraniums, and various other Stove and Greenhouse Plants are in full perfection.

IN JUNE AND JULY—

The Rhododendrons, Azaleas, and Roses out of doors, are the principal attraction.

IN JULY, AUGUST, AND SEPTEMBER—

The various collections of Bedding Plants, Phloxes, Asters, Dahlias, Geraniums, &c. are the principal features.

At this time also the Orchard Houses are full of Fruiting Trees, of Peaches, Nectarines, Pears, &c., &c., and these are well worth inspection.
